Corporate Taxpayer's ID (CNPJ/MF) No. 07.859.971/0001-30
Company Registry (NIRE) No. 33.3.0027843-5

NOTICE TO THE MARKET

Transmissora Aliança de Energia Elétrica S.A. (B3: TAEE3, TAEE4 and TAEE11) ("Taesa" or "Company") informs its shareholders, the market in general and other interested parties that the Unified Environmental License ("LAU") was granted by the State Secretariat for the Environment and Infrastructure ("SEMA") for the Encruzo Novo Substation, referring to the concession facilities for the Tangará Transmissora de Energia Elétrica S.A. ("Tangará").

Obtaining the LAU is an important milestone for the project as it allows work to begin on the corresponding section.

In addition, two Preliminary Licenses ("LP") were also granted, one by the Brazilian Institute of the Environment and Renewable Natural Resources ("IBAMA") for LT 230kV Açailândia-Dom Eliseu II and the other issued by SEMA/MA for the LT 230kV Encruzo Novo - Santa Luzia III, both referring to the facilities of the Tangará concession.

Obtaining the LP is an important milestone for the project, as it attests to the socio-environmental viability of the project. Next, the process of requesting the Installation License ("LI") begins, through the executive project protocol and the basic environmental plan.

Tangará is a project referring to lot 3 of transmission auction nº 02/2022, held in December 2022, 100% controlled by Taesa. Tangará has a total RAP of R\$ 104.7 million for the 2023-2024 cycle and an ANEEL Capex of R\$ 1,117 million. The project is located in the states of Maranhão and Pará, with approximately 279 km of transmission lines, 72 km of which are double circuit. The deadline stipulated by ANEEL for energizing Tangará is March 2028.

TANGARÁ

Voltage (kV): 230 kV
LT Length (km): 279 km
Substations: 3
